

DPF CLEANER DIESEL

Diesel DPF cleaner
Additive to add to Diesel fuel

TYPE OF USE

MOTUL DPF CLEANER DIESEL is a cleaner additive designed to be used in all types of Diesel engines, with direct or indirect injection, naturally aspirated or turbocharged, with DPF (Diesel Particulate Filter) and/or with SCR (Selective Catalytic Reduction) systems. MOTUL DPF CLEANER DIESEL effectively increases the performance of the DPF regeneration. Mixed with the Diesel fuel, it provides:

- Faster and more efficient cleaning of the DPF
- Restores original power and performance

provides a perfect lubrication during cleaning phase and prevents removed micro-particles from depositing. Moreover, it prevents from Diesel fuel oxidation and micro-organisms formation.

PERFORMANCES

A clean DPF system is a necessary condition for an effective engine functioning. By increasing DPF regeneration performance, MOTUL DPF CLEANER DIESEL allows to:

- Faster and more efficient cleaning of the DPF
- Maintenance of the cleanliness of the DPF
- Increased reliability

The use of MOTUL DPF CLEANER will ensure:

- Improved engine performance and driving pleasure
- Increased power: improved start-up, idling and acceleration
- Reduced fuel consumption and pollutant emissions at the exhaust

RECOMMENDATIONS

Pour one whole can of MOTUL DPF CLEANER DIESEL in the Diesel tank before refueling. A can is sufficient for Diesel fuel tanks from 20 up to 40 liters.

- In curative mode, pour the entire bottle for 20L of Diesel (on the dashboard: DPF warning light on).

DPF CLEANER DIESEL

Diesel DPF cleaner
Additive to add to Diesel fuel

- In preventive mode, pour the entire bottle for 40L of Diesel (every 5000 km).
To maintain the benefits of DPF cleaning, use MOTUL DPF CLEANER DIESEL regularly for optimal performance.
