

This wide range of direct replacement carburettors has been developed by Webcon in the U.K. to cover the following selection of makes and models whose original carburettors may have proved to be troublesome or are expensive to replace. They are complete kits with detailed fitting instructions suitable for D.I.Y. or professional fitting. All kits listed feature manual choke carburettors unless otherwise stated and they are all very keenly priced. These kits have been developed for manual transmission vehicles and may not be suitable for those equipped with auto-transmission unless otherwise stated – if in doubt please consult an authorised Weber Dealer.
